

Energy Efficiency Innovation Seminars Sustainable Architecture & Urban Planning

To inspire the next generation of architects, engineers, urban planners and construction managers, the German American Chamber of Commerce of the Midwest, Inc. (GACCoM) is organizing the **Energy Efficiency Innovation Seminars: Sustainable Architecture & Urban Planning** series at four Midwestern universities. A select group of leading German companies from the field of architecture and urban planning will present their latest technology and projects incorporating innovative, energy efficient solutions. The seminar will also include a presentation by a recent Alumni of GACCoM's Transatlantic Program-Young Technology Leaders (TAP-YTL): Sustainable Architecture & Urban Planning. These young leaders from the field of Sustainable Architecture and Urban Planning will report on their experience of energy efficient technology and services during their TAP-YTL program in Germany and how it has influenced them and their work in the United States.

Presenting German Companies

DIAL
light. building. software

DIAL GmbH offers the lighting design and calculation software "DIALux" which allows engineers and architects to visualize the effect of lighting, calculate the effects of artificial and daylight, and conduct energy efficiency calculations and optimizations.

EB

Ebert & Baumann Consulting Engineers develop concepts for green & sustainable buildings and neighborhood developments in the US and around the world. Their services cover the entire life cycle of buildings: energy audits and feasibility studies, the development of design concepts, and monitoring of the performance of buildings and systems.

Schöck

Schöck Bauteile GmbH manufactures innovative insulation products such as the *Schöck Isokorb*, which is a heat-insulating load-bearing element for the thermal partitioning of free cantilever balconies.

-weishaupt-

Weishaupt, one of the world's largest manufacturers of high efficiency oil and gas burners, is the industry leader in combustion technology worldwide. While supplying burners as part of new boiler installations for commercial, industrial and residential applications, they also specialize in energy efficient retrofits for existing burners.

Presenting TAP-YTL Alumni

- Alexander Al-Hamden, Founder & Creative Director, Arccentric, Chicago, IL
- Hyon Rah, Creative Director, Rah Squared, Seattle, WA
- Sharon Weiner, Development Manager, The Habitat Company, Chicago, IL
- Shiva Haghighi, Graduate Research Assistant, Purdue University, West Lafayette, IN
