

Beyond the Climate Wars: Why the **Left** and **Right** Can Agree on Energy Innovation

Michael Shellenberger and Ted Nordhaus of
The Breakthrough Institute

Thursday, February 24 at 7:00pm
The Fluno Center • 601 University Ave • UW-Madison

Free public lecture!

Reception for students following the event -
learn about Breakthrough's paid summer fellowship!

Authors of the essay "The Death of Environmentalism" and the award-winning book, Break Through, Shellenberger and Nordhaus propose "post-partisan power" – \$25b in federal funding to accelerate energy innovation. They call on the Left to stop focusing on carbon caps and on the Right to stop opposing increased federal investment. They argue that the collapsed Kyoto and cap-and-trade climate policy regime creates a new opportunity for bipartisan action on energy innovation.

UNIVERSITY OF WISCONSIN-MADISON
**Center for World Affairs
and the Global Economy**
